

E Squared is a leader in the production of TPU & EIA coated fabrics for flexible storage tank applications, including pillow tanks, onion tanks, flexitanks, & booms.

Our REZcoat™ & ERcoat™ products are engineered & thoroughly tested to ensure extreme resistance to chemicals, abrasion, puncture, as well as high UV stability. **E Squared** coated fabrics are specifically designed to withstand the necessary conditions of storing and transporting liquids for an extended period of time while maintaining flexibility and durability. All **E Squared** coated fabrics are approved by the major standard certification bodies internationally, including the FDA, MIL-T specs, NSF/ANSI 61, WRAS, AS/NZS 4020:2005.

E Squared coated fabrics are available in a wide range of TPU, PVC, EIA, and PVC/PU blends. All E Squared products can be welded with Radio Frequency (RF), Hot Air, Wedge Welded or Glued. Flexible storage tank applications include tanks for potable or waste water, oils, biofuels, gasoline, kerosene, avgas, diesel fuels, jet fuels (A, B, JP-1, JP-4, JP-8), and foods (wine, juices and concentrates, edible oils), tanks for cleaning products.

For more information on **E Squared Tank & Bladder products**, call us at 908-558-0899 or visit www.e2techtexiles.com/tanks-bladders/.

BENEFITS

- UV Resistance
- NSF 61 Approved for Potable Water
- Resistant to Chemicals and Hydrocarbons
- High Abrasion
- High Puncture
- High Tensile Strength
- Exceeds Military Specifications
